Please pay attention to the installation direction of battery during its replacement.

Safety instructions:

The following instructions are essential for proper installation, assembly, mounting and operation. Please keep these instructions for future reference! Always refer to the technical data on the product. Subject to technical alterations. Please read the following (safety) instructions carefully!

1. If you are not confident carrying out the installation or assembly yourself, or if there is no access to the mains at the desired installation point, you must have a qualified electrician assist you.
2. The light source of this luminaire cannot be replaced, when the light source has reached the end of its service life, the entire luminaire must be replaced.
3. Please only use the LED driver which provided with this LED strip.
4. Do not connect this LED strip to the supply while it is in the packing.
5. Electrostatic charges can damage or destroy the LED. Do not touch the LED chip, LED contacts, conductors or connector pins.
6. For indoor use only.
7. Do not bend, crush or pull the cable, protect from sharp edges, oil and heat.
8. If the power cable is damaged, the product is unusable.
9. We are not liable for damage caused by improper use, handling, installation, modification or alteration, nor is it covered by the guarantee/warranty.

For indoor use only

Class III product

Class II LED driver

CE conformity marking

The manufacturer shall certify with an EC declaration of conformity, that the product complies with all applicable European Community Directives.

Environmentally friendly disposal

Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.

Notes on battery disposal:

The symbol means that batteries should not be thrown out with household rubbish. Consumers are obligated legally to return old batteries. Used batteries have to be returned free of charge to the sales outlet or other collection points. The collecting and recycling of batteries are significant elements of the strategy for protecting human health and the environment. Pollution by batteries needs to be reduced to a minimum to thereby contribute to the protection, maintenance and improvement of the quality of the environment.

Exclusion of the warranty

- The lifetime is an average information but it can happen that ten percent of the LEDs will be out of function before the lifetime is reached.
- The glue will slightly change the color after using, which is a normal process and can't be avoided.
- The remote controller is not meant to be a lighting on/off switch, it should only activate or deactivate the IR or PIR sensor function.
- It may happen on few points that the glue layer will come off a little, this is due to normal bending process which can't be avoided.

Please push the layer back on the base after installation.
